Greg Krueger, PE

Program Director for Emerging Technologies in
Transportation and Associate Vice President

HNTB Corporation

gkrueger@hntb.com

Greg Krueger, PE, serves HNTB as program director for emerging technologies in transportation. He is an associate vice president, with an emphasis on automated and connected vehicles.

Krueger is responsible for marketing and program initiatives associated with emerging mobility solutions across the country. With more than 20 years of experience, he is working with both private and public-sector clients to facilitate the deployment of connected and automated vehicles on the nation's roadways.

Additionally, Krueger serves as chairman of the Committee on Intelligent Transportation Systems of the Transportation Research Board.

Previously, Krueger was manager of the U.S. Department of Transportation Southeast Michigan Connected Vehicle Test Bed where he oversaw the day-to-day operations and technology enhancements for the original Proof of Concept facility.

Krueger also served as Michigan Department of Transportation's program manager for its statewide Intelligent Transportation Systems program, overseeing all development, deployment, operations and maintenance of ITS throughout the state of Michigan.

His views and expertise are regularly requested by media outlets nationwide.
